

guida alle escursioni 1-3 aprile 1978

ISTITUTO DI GEOLOGIA E GEOFISICA DELL'UNIVERSITÀ DI NAPOLI
GRUPPO SPELEOLOGICO DEL C.A.L. SEZIONE DI NAPOLI
NAPOLI 1978

**PROCESSI PALEOCARSICI E NEOCARSICI
E LORO IMPORTANZA ECONOMICA NELL'ITALIA MERIDIONALE**

guide
to
excursions
1-2 April, 1928

(COVER ILLUSTRATION: SKETCH BY H. CLOOS, 1946)

contents

Foreword

1. Introduction
2. Geology and Geomorphology
 - 2.1 Structural framework of Southern Apennines
 - 2.2 Structural-stratigraphic units
 - 2.3 Pre-Pliocene paleogeographic evolution
 - 2.4 Neotectonics
 - 2.5 Plio-Pleistocene geomorphological cycles
 - 2.6 Coast morphology
3. First Excursion: Paleo-and Neokarstic Processes in the Alburno-Cervati Structural-Stratigraphic Unit
 - 3.1 The Alburno-Cervati structural-stratigraphic Unit
 - 3.2 Window Geology
 - a - From Naples to Pompei: the Vesuvius
 - b - From Pompei to Salerno and Battipaglia: the Cava Furrow, and Picentini Mountains
 - c - From Battipaglia to Campagna and Capaccio crossroads: the Sele River Plain
 - d - From Capaccio crossroads to Castelcivita: the Calore Graben
 - 3.3 Paleokarstic features of the lower Tertiary in the Trentinara Mountains
 - 3.4 Karstic features of the Alburni Mts. (Castelcivita Caves)
 - 3.5 Paestum: the ancient greek town
4. Second Excursion: Paleo-and Neokarstic Processes in the Matese-Monte Maggiore Structural-Stratigraphic Unit
 - 4.1 The Matese-Monte Maggiore structural-stratigraphic Unit
 - 4.2 Window Geology
 - a - From Benevento to Vitulano and Solopaca: the Campanauro Mountain
 - b - From Solopaca to Telesio and Piedimonte: the Calore and Volturno River Valleys west of Ponte

- c - From Piedimonte to Miralago and Bocca della Selva: the Matese Massif between the Lake and the Regia Piana
 - d - From the Regia Piana to Cerreto Sannita: the Titerno River furrow.
- 4.3 Hypogean paleokarstic features of Mt. Camposauro Cretaceous carbonates
- 4.4 The Torano and Maretto springs
- 4.5 The epigeal paleokarstic features of the Regia Piana Cretaceous carbonates and their bauxite deposits
5. Third Excursion: Paleo-and Neokarstic Processes in the Murge-Gargano Structural-Stratigraphic Unit
- 5.1 The Murge-Gargano structural-stratigraphic unit
- 5.2 Window Geology
- a - From Benevento to Candela: the outer Apenninic margin
 - b - From Candela to Spinazzola: the Ofanto and Locene river valleys
 - c - From Spinazzola to Locorotondo: the Murge area
 - d - Itria Valley and Pirro Canal
- 5.3 Paleokarstic features of the Cretaceous carbonates in the Murge area
- 5.4 Castel del Monte
- 5.5 The Castellana Caves
